Partnership to Provide Online Resources with Learning System Atomic Learning and Creative Learning Systems form Partnership

April 4, 2008, Little Falls, MN, and Longmont, CO -- Atomic Learning, award-winning provider of Web-based software training and support, and Creative Learning Systems, the leader in 21st century learning labs for schools, recently announced a partnership. Through the partnership, Creative Learning Systems' will offer customers access to Atomic Learning's library of over 35,000 software training tutorials as an integrated resource in its SmartLab™ learning system.

The SmartLab™ is a fully-integrated 21st century learning lab that includes furniture, hardware, software, curriculum, technology-based learning tools, resources, and supplies – a powerful learning environment supported with unparalleled professional development, assessment tools and technical assistance. Matt Dickstein, CEO of Creative Learning Systems said, "Atomic Learning is a valuable addition to our SmartLab™ resources. It provides learners with an extensive library of software tutorials to help them develop and document their SmartLab™ projects.

"Atomic Learning is excited to be working with Creative Learning Systems to provide robust and media-rich training materials with SmartLabs™." says Atomic Learning CEO, Dan Meyer. "We know that SmartLabs™ support the needs of educators and students and enhance classroom collaboration. Atomic Learning is committed to helping educators and students get the most out of their investment in their SmartLab™ learning system through the easy-to-use real-time support and training provided via Atomic Learning's comprehensive library of tutorials."

About Creative Learning Systems

Creative Learning Systems develops 21st century learning labs and media production systems for schools. Since creating the first technology lab in a U.S. school in 1987, the company's SmartLab™ learning systems have set the standard for integrating applied technology in education. SmartLabs™ feature a project-based, student-centered approach that challenges and engages students of *all* abilities. In a SmartLab™, students develop 21st century skills such as critical thinking, collaboration, project planning and communication. In cooperation with its partner schools across the country, Creative Learning Systems is helping prepare students to compete in a global economy.
